

Recycling of batteries

Acer is dedicated in protecting and improving the environment in every aspect of our operations. At Acer India, we believe that it is our responsibility to ensure that we do business in such a manner that it enriches our environment and planet. That's why we make sure that we deliver innovative and ecofriendly electronic products to our consumers. We are committed to product stewardship through the life cycle of our electronics, and ensure compliance with e-waste rules in India.

We are committed to providing our customers with sound avenues to responsibly manage Acer's branded products that have reached the end of their useful life. Acer supports the concept of Individual Producer Responsibility and is committed to bringing reasonably convenient methods of electronic product recycling to its customers

As an environmentally responsible organization and being committed to ensuring compliance with the new India E-Waste Management and Handling Rules 2011, we have partnered directly with Exigo Recycling Pvt Ltd who is authorized by the State Pollution Boards & Govt. of India to safely Collect, Transport, Dismantle, Segregate & Dispose E waste including used/dead batteries of Acer-branded products
